

ANIMALS AND GEOGRAPHY

classes
7-9

1 Label the *biogeographical regions* on the map:

North America & Eurasia, South America, Tropical Africa, Southern Asia, and Australia & Oceania.

2 Find example animals from Korkeasaari Zoo for each region and think about whether they are adapted to cold, temperate, warm, or hot climates.

Which region had the most species? Why do you think these particular species are common in Korkeasaari Zoo? Write your answers on the map or continue on the back of the paper.

ANIMALS AND GEOGRAPHY

classes
7-9

You can continue your answers for task 2 here if needed:

3 Now choose a continent to examine more closely using one or two example species.

Which continent?

What special features does it have?

What animals live there in the wild?

What animals from there are at Korkeasaari Zoo?

What kind of climate does the area have?

What kind of environments do the animals live in?

What kind of vegetation zones do you know from the area?

How is this area different from Finland, or is it similar?
